

### Money Services Businesses CSV Upload File Specifications and Validation Errors

# **Change History**

| <b>Change Date</b> | Description   |
|--------------------|---|
| 12/1/2022          | Updated fields for the Version 3 changes to the ST and TA components. |

#### **Document Sections**

- <u>Upload File Format Specification</u>
- Validation Errors

### **Upload File Format Specifications**

- The file must be in one of the formats specified below.
- Failure to provide the file in ".csv" format will prevent the upload of the file to NMLS.
- Failure to provide the column headers exactly as identified below will prevent the upload of the file to NMIS.
- Failure of a single row will result in the failure of the entire file. Errors must be resolved and the entire file uploaded again.

### **Upload File Specification**

| Column<br>Header | Format/ Description   | Required?         | Format   |
|------------------|---|-------------------|--|
| Description      | The description of the field name to help the user identify what value is being uploaded. | No                | Refer to Description in<br>Description & Name<br>Mapping |
| Name             | The field identifier for which the value is   | Yes               | Refer to Name in Description                             |
|                  | being provided.   |                   | & Name Mapping   |
| Value            | The numeric value provided for the  | Yes               | Numeric characters only;                                 |
|                  | corresponding MSB Call Report field Name.   |                   | maximum of 13 digits.                                    |
| State            | The abbreivated state code that must be   | Yes for ST filing | Two letter state code                                    |
|                  | provided for state specific filing component.   | section           |  |

### **Additional Considerations**

- CSV upload will not be used to create an initial MSBCR filing.
- Comments and PDF files cannot be input via CSV files.
- No validations are performed on the 'Description' column.
- There will be no mechanism to display the upload history or errors on the upload file..
- All valid rows will be processed. Numeric values will overwrite existing value.
- Values not provided in the CSV will be retained on the pending filing.
