

NMLS MONEY SERVICES BUSINESSES CALL REPORT OVERVIEW

The NMLS Money Services Businesses (MSB) Call Report is comprised of four sections: company financial information, information about the licensee's company and state level transactional activity, company permissible investments information, and transaction destination country information. The development of the NMLS MSB Call Report draws from various reports required of states and seeks to replace and standardize individual financial and activity reports currently required by state financial regulators.

Purpose of the NMLS Money Services Businesses Call Report

The purpose of the NMLS MSB Call Report is to provide timely, comprehensive, and uniform information and reporting frequencies concerning financial condition, transactional activities, and compliance with state permissible investment requirements on entities licensed as money services businesses. The objectives of the NMLS MSB Call Report are as follows:

1. Provide state regulators with the information necessary to replace the unique reports currently required by approximately 36 states and to standardize reporting of financial condition information.
2. Provide state regulators with information to most effectively supervise licensees, such as determining examination schedules, risk assessment analyses, monitoring compliance with state law and permissible investment requirements, and accurately calculate assessments, where applicable.
3. Provide state financial regulators with the ability to develop detailed transactional activity reports with the ability to compare across state lines.
4. Provide licensees with the ability to automate the provision and retention of financial condition, transactional data, and permissible investment amounts to one or more state regulators in a single uniform manner.
5. Provide licensees with standard reporting frequencies for ongoing financial condition, transactional activity, and permissible investment reporting requirements.

Background

State Regulatory MSB Reporting

Approximately 36 states require licensed money services businesses companies to submit quarterly or annual reports providing transactional activity and permissible investment amounts, often including information on in-state, foreign, and domestic transactions,

permissible investment details, agent transaction details and volume and dollar amount of transactions completed. These reports are utilized by state regulators for a variety of reasons, including calculating assessments, risk assessment, scheduling exams, determining legislative compliance, and generating reports on transactional activity within a state and at the national level.

In addition to the reporting requirements detailed above, the majority of state money services businesses regulators require financial statements and/or financial condition information to be provided on an ongoing basis. NMLS currently has functionality that permits licensees to file a single financial statement with one or more regulators through the System. This existing functionality does not facilitate the use of financial information in data analytics tools that enable a more in-depth analysis to be completed.

NMLS Money Services Businesses Call Report Working Group

A working group of state regulators was formed in February 2015 to develop the NMLS MSB Call Report and accompanying definitions and policies. The roster of the NMLS MSB Call Report Working Group can be found in *Addendum A* of this document.

NMLS Money Services Businesses Call Report Detail

Report Sections

The NMLS MSB Call Report is a routine report submitted through NMLS by an entity with at least one money services business license. The report is comprised of four sections:

1. Section I: Financial Condition Report (At Company Level¹)
2. Section II: Transaction Activity Reporting²
 - a. Company-wide Transactions Detail
 - b. State Transactions Detail
3. Section III: Permissible Investments Report (At Company Level)
4. Section IV: Transactions Destination Country Reporting
 - a. Company-wide Transactions Destination Country Detail
 - b. State Transactions Destination Country Detail

¹ The financial condition report of the MSB Call Report must be reflective of the licensee and not “rolled-up” or consolidated information of the parent company. The financial statements must be consolidated at the licensee level. Financial condition information shall include consolidated financial data for the licensee submitting the report inclusive of its subsidiaries.

²Agent level transaction reporting is not included in the initial deployment of the MSB Call Report. It is intended for agent level transaction reporting to be included in a later version of the report (date to be determined).

Companies are only required to complete data fields in the Transaction Activity Reporting Sections (Section II) that are relevant to the company's MSB activities and/or authorities. Relevancy is determined by business activities selected by the licensee on the Company Form (MU1). Section III (Permissible Investments Report) will only be required for licensees completing activities that are relevant to permissible investment requirements. The intention is for those areas of the NMLS MSB Call Report that are not applicable to a specific company to not be required, by the System, to be completed. For example, if a company only conducts check cashing activity, the System will only require the licensee to complete the financial condition report, and company-wide and state check cashing transactional activity data fields.

Section IV(a) and IV(b) Destination Country Detail must only be submitted as part of the fourth quarter submission by money transmission licensees engaged in foreign money transmission activity³. Data submitted as part of the Destination Country Detail must include all foreign transactions completed during the entire calendar year.

Submission of Report

The NMLS MSB Call Report applies to licensees who conduct the following activities: money transmission, check cashing, issuing or selling travelers checks, issuing or selling drafts, foreign currency dealing and exchange, issuing or selling money orders, bill paying, issuing or selling prepaid access/stored value products, and virtual currency.

Companies holding an MSB license during the calendar quarter will be required to file the NMLS MSB Call Report. The NMLS MSB Call Report may only be submitted through NMLS; therefore in order for entities to submit the report, they must have an active record in NMLS.

The Financial Condition Report (Section I), Company-wide Transactions Detail (Section II (a)), and Permissible Investments Report (Section III) are only required to be submitted once per quarter, even if the entity is licensed in multiple states. The State Transaction Detail (Section II(b)) is only required to be submitted once per quarter for each state that adopts the NMLS MSB Call Report and in which the company is licensed. All required report sections must be submitted at the same time, but can be prepared in the system prior to final submission.

Report submission options are intended to include manual data field entry and a bulk upload functionality facilitated through an .xml file or .csv spreadsheet (template to be provided on the NMLS Resource Center).

For Sections I, II(a), II(b), and III, data submitted must be based on the activity completed in the quarter. For Section IV(a) and IV(b) Destination Country Detail, data submitted must be for the entire calendar year.

³Virtual currency activity does not require destination country reporting.

Reporting Frequency

All sections, except the transaction destination country reporting Sections (IV(a), IV(b)), are due each calendar quarter. As noted below, only certain sections are required to be completed by licensees engaged in relevant business activities. Submission must be completed within 45 days of the end of the calendar quarter.

Section	Name	Data Level	Data Period	Submission	Due
I.	Financial Condition Report	Company	Quarter	Required	45 Days After End of Each Quarter
II.(a)	Company-wide Transactions Detail	Company	Quarter	Required	45 Days After End of Each Quarter
II.(b)	State Transactions Detail	State	Quarter	Required	45 Days After End of Each Quarter
III.	Permissible Investments Report	Company	Quarter	Required for licensees engaged in money transmission, payment instrument, stored value, virtual currency, and other relevant business activities.	45 Days After End of Each Quarter
IV.(a)	Company-wide Transactions Destination Country Detail	Company	Annual	Required for licensees engaged in foreign money transmission Activity.	45 Days After End of the Fourth Quarter
IV.(b)	State Transactions Destination Country Detail	State	Annual	Optional requirement for licensees engaged in foreign money transmission activity.	45 Days After End of the Fourth Quarter

Failure to submit the report within 45 days of the end of the calendar quarter results in the creation of a license item placed on relevant licenses held by a company and may result in a regulatory action. Such license items may prevent the renewal of the entity's license.

Calendar Year Basis

The Report requires information on a calendar year basis. The first quarter is defined as January, February, March; the second quarter is defined as April, May, June; the third quarter is defined as July, August, September; and the fourth quarter is defined as October, November, December.

Licensees with a fiscal year basis that does not end on December 31st must still file the report on a calendar year basis in accordance with the quarter schedule noted above.

Report Adoption

The NMLS MSB Call Report is a uniform form that will be completed by MSB companies, licensed in states that require their licensees to submit the report. States that adopt the report, adopt all sections of the report, with the exception of *optional* Section IV(b), and entities licensed in the state will be required to complete submission of the report in accordance with the schedule detailed above.

For companies licensed in multiple states that adopt the report, the company-level sections only need to be completed in the system once per submission. A company holding more than one license type in a single state is only required to submit one NMLS MSB Call Report for that state. A company licensed in multiple states will complete a separate State Transactions Detail

(Section II(b)) for each state that adopts the NMLS MSB Call Report and in which the company is licensed.

Section IV(b), State Transactions Destination Country Detail, is an optional section for states to adopt. This section provides functionality for states to receive state transactions destination country data to be submitted as part of the report on an annual basis.

Adjustments of Submitted Reports

Licensees are permitted to revise previously submitted quarterly reports up to 24 months after the report is submitted. Any adjustment in a previous quarter should be reported as a correction to that quarter. This is the same functionality that is available with the NMLS Mortgage Call Report and addresses the need for revisions and adjustments to quarterly reports submitted by licensees.

Financial Condition Accordance with GAAP

Unless otherwise directed in the NMLS MSB Call Report Field Definitions, the report requires licensees to present their financial condition as follows:

1. In accordance with U.S. generally accepted accounting principles (GAAP) unless as directed in the MSB Call Report Field Definitions; and
2. In U.S. Dollars.

Virtual currency valuation must be in U.S. Dollars and should be based on a generally accepted exchange rate and the licensee, when requested, should be able to document and substantiate how they arrived at the valuation.

Consolidated Financial Information

The financial information provided in the Financial Condition Report (Section I) of the NMLS MSB Call Report must be reflective of the licensee's activities and is only required to be completed once per licensee per calendar year quarter. The financial statements must be consolidated at the licensee level. Financial condition information shall include consolidated financial data for the licensee submitting the report inclusive of its subsidiaries, in accordance with GAAP consolidation rules. Consolidated financial information at the parent level or that contains parent company financial information is not acceptable for the NMLS MSB Call Report.

Audited Financial Statements

In adopting states, companies that, under state laws or regulations, are required to submit a self-prepared financial statement as part of maintaining a money services business license or registration may use the NMLS MSB Call Report to meet this requirement. Companies that are required to submit a Compiled, Reviewed, or Audited financial statement must continue to

submit these financial statements through the existing financial statements functionality in NMLS in addition to the NMLS MSB Call Report.

Information Sharing

All data submitted in the report is confidential, but will be available to all state regulators under the System's information sharing architecture. Similar to other data in the System, the sharing of information amongst state regulators is specifically permitted under 12 U.S. Code § 5111 of the SAFE Act. This section permits information and material in NMLS to be shared with all state and federal regulatory officials with mortgage or financial services industry oversight authority without the loss of privilege or the loss of confidentiality protections provided by federal and state laws.

State, regional, and national aggregated data that does not disclose any particular company's information will be made available by SRR in industry statistics and other related reports.
