

# NMLS Release 2017.1 Release Notes

Release Date: March 20, 2017

The purpose of these release notes is to provide a summary of system enhancements included in NMLS Release 2017.1.

The Roadmap enhancement targeted for Release 2017.1 is:

- The NMLS Money Services Businesses Call Report (MSBCR) is a routine report that will be submitted through NMLS by an entity that maintains at least one money services businesses (MSB) license in NMLS in states adopting the report.

General Enhancements

- [Electronic Surety Bonds](#)

[System Maintenance Updates](#)

# Money Services Businesses Call Report – MSBCR (State Context)

**SUMMARY:** The [NMLS Money Services Businesses Call Report \(MSBCR\)](#) is a routine report that will be submitted through NMLS by an entity that maintains at least one money services businesses license in NMLS in states adopting the report.

## Report Content

The report is comprised of four sections. The following three sections are being delivered in the 2017.1 release:

1. Section I: Financial Condition Report (At Company Level)
2. Section II: Transaction Activity Reporting
  - a. Company-wide Transactions Detail
  - b. State Transactions Detail
3. Section III: Permissible Investments Report (At Company Level)

## License Settings

Regulators can control the required sections to be reported by MSB licensees through the License Settings below:

- a) MSBCR Required – If selected by the state regulator, will require submission of following sections:
  1. Section I: Financial Condition Report (At Company Level)
  2. Section II: Transaction Activity Reporting
    - a. Company-wide Transactions Detail
    - b. State Transactions Detail
  3. Section III: Permissible Investments Report (At Company Level)

# Money Services Businesses Call Report – MSBCR (State Context)

## MSB Call Report Completion and Submission

The MSB Call Report must be completed and submitted for each calendar quarter. Details regarding the submission frequency and deadline for each section of the MSB Call Report are provided in the table below:

Section	Name	Data Level	Data Period	Submission	Due
I.	Financial Condition Report	Company	Quarter	Required	45 Days After End of Each Quarter
II.(a)	Company-wide Transactions Detail	Company	Quarter	Required	45 Days After End of Each Quarter
II.(b)	State Transactions Detail	State	Quarter	Required	45 Days After End of Each Quarter
III.	Permissible Investments Report	Company	Quarter	Required	45 Days After End of Each Quarter

If allowed or required, licensees will be able to manually enter data fields or perform bulk uploads through an .xml file or .csv spreadsheet. In addition, company users will have the optional ability to provide a supporting PDF file for certain fields in Section I and Section III along with an explanation if the values provided exceed a pre-defined percentage.

Areas of the MSB Call Report that are not relevant to a specific company will be prefilled with zeros by the System. Relevancy will be determined by business activities selected by the licensee on the Company Form (MU1).

## Data Accuracy

Calculations, data validations, and completeness checks will be performed by the System to improve the accuracy of the information submitted and reduce possible data entry errors.

## Amendments

Adjustments to previously submitted reports can be made up to 24 months after the quarter end for which the report was submitted. Any adjustment to a submitted report will be reported as an amendment to that quarter.

## User Roles

Three new user roles will be available for assignment to company users responsible for managing the MSBCR functions for their company:

1. *View MSBCR Filings* – This role will allow the user to view pending and processed filings.
2. *Create and Edit MSBCR Filings* – This role will allow the user to view/create/edit filings.
3. *Create, Edit, and Submit MSBCR Filings* - This role will allow the user to view/create/edit/submit MSBCR filings.

# Money Services Businesses Call Report – MSBCR (State Context)

## Industry Dashboard

The company dashboard will be updated to indicate whether the company has an upcoming MSB Call Report filing deadline, as well as an indicator for filings pending submission. It will also include the submission status for the upcoming filing requirement.

## Enforcement

Failure to submit a required MSB Call Report prior to 45 days after the end of the calendar quarter will result in a system-set license item being placed on all of the company's active licenses requiring an MSB Call Report filing. The System will automatically clear license items upon submission of an MSB Call Report filing for the appropriate period.

## Composite View

Filing history and submissions can be viewed by the following users under the Composite View tab:

1. Regulator users with Company Composite role if their agency manages at least one license that corresponds to MSB license in NMLS.
2. Support users with company composite role.
3. Company users with company composite role.
4. Federal Supervisory Agency Users with the CFPB role.

## Regulator Work List

Regulators will be able to subscribe to MSB Call Report review items so that work items will be generated when an initial or revised MSB Call Report is submitted.

## Notifications

Companies will be able to subscribe to the system-generated notifications listed below. If a specific user is not subscribed to the notifications, account administrator (AA) users will receive them.

1. MSBCR Calendar Quarter Filing Required – Triggers one day after the calendar quarter ends.
2. MSBCR Filing Deadline Approaching – Triggers 15 days before the filing deadline.

## Reports

Regulator with the Reports role will be able to generate an MSBCR Activity Report that will include MSBCR data submitted by companies that have at least one MSB license in any status within the viewing user's jurisdiction. Additionally, support users with the Reports role and Federal Supervisory Agency Users with CFPB role can generate this report for a specific jurisdiction.

# General Enhancements

SCR Number	Title	Description	Context
37709 37710	Surety Bonds: Updated Regulator Workflow	When a regulator accesses bonds via a review item link in a work item, the regulator will be taken to the Surety Bond Detail view under the Tasks tab. This navigation change was made in preparation for the Regulator Return to Surety functionality, which will be delivered in a later release. License instance and licensee-level bond lists including the Surety Bond Detail view (now available under the Tasks tab) will duplicate the existing List view currently available under the Composite View Tab. Breadcrumbs will allow the regulator to return to the work item.	State
36704	Surety Bonds: Display SC/UC as groups in Licensee Authority creation workflow	Search results will display all approved underwriting companies (UC) associated to the surety company on a single line to clearly indicate all underwriting companies that will have authority granted when the licensee grants authority to the surety company. "Authorized Surety Entities" page will also display all approved underwriting companies for each surety company that has licensee authority.	State
33227	Surety Bonds: Allow SC to manage pending bonds/riders created by SBP	A Surety Company (SC) user will be able to edit or sign bonds and riders associated to it or its related underwriting companies that were created by the Surety Bond Producer (SBP) for those bonds in "Requires Rep Signature" or "Return to Surety" status. Actions taken on a bond or rider by an SC user will be validated against bonding constraints defined for the user performing the action, not those of the SBP user that created the bond or rider. The SBP may continue to manage the bond or rider per existing functionality after it has been managed by the SC.	State

# General Enhancements

SCR Number	Title	Description	Context
32999 37176 38201	Surety Bonds: Bond Versioning – New Bond Version Implementation	<p>Regulators will be able to provide updated text for electronic surety bonds in NMLS. When a new bond version is activated in NMLS, all bonds created for a license type associated to the bond will use the new bond version. In connection with the bond versioning enhancement, a bond version number including the state agency abbreviation and version activation date will be assigned to each bond form and will be displayed with bond metadata and at the bottom of each bond rendering.</p> <p>Upon activation of the new bond version, all undelivered bonds will need to be upgraded prior to delivery to the regulator. In addition, regulators will identify whether delivered bonds require issuance of a revised form bond when a new bond version is provided for implementation.</p> <p>The Rider Effective Date will reflect the effective date of the latest rider or revised form bond, and any existing rider effective date field label or column header will be updated to replace the term "Rider" with "Revision", this includes but is not limited to: SC and SBP Bond Management, Composite view, Company and Individual surety bond pages.</p> <p>Transactions related to revised form bonds will have a new Revised Form prefix in the transaction details and the SC/SBP transaction reports.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
33221 36443 36778 36796 36981	Surety Bonds: Bond Versioning – Upgrading Undelivered Bonds	<p>When a new bond version is activated for the bond form, NMLS will require all bonds that have not been delivered to the regulator be upgraded. If the bond is pending licensee action, either “Pending Principal Signature” or “Executed” and undelivered, the System will un-sign the bond and return it to surety for upgrade.</p> <p>A batch notification regarding the return of the bonds for upgrade will be sent to impacted surety users to avoid sending separate notifications for each bond. Subscribed SBP users, assigned underwriter users, or subscribed SC users, if no underwriter is assigned, will receive the bulk notification if at least one relevant bond is returned for upgrade. Licensees will be able to subscribe to a new “Surety Bond Returned to Surety (Bond Version Change)” notification to receive bulk notification of the list of license types whose bonds have been returned for upgrade due to activation of a new bond version. Designated individual signatories will be notified similarly via email if a bond they have signed or are designated to sign is returned.</p> <p>The surety entity user will receive a message when they attempt to manage a bond that requires upgrade. The previously issued bond in the old bond version will display in read-only mode beneath the message. The surety user will NOT be able to change any of the bond field values in connection with upgrading the bond to the new bond version. Surety entities will also have the option to delete the undelivered bond instead of upgrading it.</p> <p>Once the upgraded bond has been signed by the surety, the licensee will be alerted that the bond requires signature via notification under the existing Bonds Pending Action subscription and the dashboard.</p> <p>Existing functionality will be used for surety entities to manage the upgraded bond going forward. Licensees will also use existing functionality to manage and deliver the executed bond to the state regulator, which generates the relevant regulator work item/review item.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
36799 36800 37033	Surety Bonds: Bond Versioning – Enforcement of Revised Form Bond Requirement	<p>When a state agency activates a new bond form version and indicates revised form bonds must be issued for existing delivered bonds, NMLS will place a license item on active licenses corresponding to a delivered bond in the previous bond form version to alert the licensee of the requirement to obtain a revised form bond. However, a license item will not be placed if the bond is in a “Notice of Cancellation” or “Cancelled” status. When rescinding notice of cancellation or reinstating a cancelled bond, NMLS will place a “Revised Form Bond Required” license item if a newer bond form version exists for the bond requiring issuance of a revised form bond.</p> <p>Information regarding the timeline for issuance of a revised form bond will be provided on the <a href="#">NMLS Resource Center</a>. If a revised form bond is required and not delivered in advance of the renewal period, the license item will prevent automatic renewal of the license.</p> <p>The System will clear the “Revised Form Bond Required” license item upon delivery of a revised form bond. If a license has more than one bond associated with it, all bonds will need to be replaced before the license item can be cleared. A license item also clears if a bond requiring issuance of a revised form bond is set to a “Cancelled” status and no other delivered bonds requiring issuance of a revised form bond exist for the corresponding license.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
33709 36605 36777 36856 36858 36859 36863 36904 36919 36979 37927	Surety Bonds: Bond Versioning – Revised Form Bond Workflow	<p>Surety entity users with the ability to manage bonds who select a bond that requires issuance of a revised form bond will be alerted via informational message of the need to issue a revised form bond. Any pending rider will need to be fully executed and delivered to the regulator or deleted prior to issuing a revised form bond.</p> <p>The surety entity user will be prompted to provide an effective date for the revised form bond. The revised form bond effective date cannot be earlier than either the bond effective date or the relevant form version activation date (whichever is later). After providing the effective date, the surety entity user can save or sign the revised form bond. If a revised form bond is deleted, all related transactions are also deleted.</p> <p>When a revised form bond is pending signature, the revised form bond header and effective date text will display with the latest bond field values rendered in the new bond version. Once the revised form bond has been signed by the surety, a revised form bond issued transaction will display in the bond transaction details with access to the revised form bond rendering using the “View Details” link for the transaction. In addition, the licensee will be alerted that a revised form bond requires signature via notification under the existing Bonds Pending Action subscription and the dashboard.</p> <p>Licensee signature of the revised form bond follows the existing rider execution workflow. This includes automatic delivery of the revised form bond to the regulator upon signature by the designated licensee representative. If the licensee returns the revised form bond to surety, the note provided will display with the pending revised form bond information when the surety user manages the revised form bond after return.</p> <p>Prior to issuing a revised form bond, surety entities will have the ability to create a rider. Also, the surety entity will have the ability to cancel the bond instead of issuing a revised form bond. NMLS will NOT allow a backdated/out-of-sequence rider to precede a revised form bond. Therefore, any field changes that need to be made with an effective date prior to the issuance of the revised form bond should be submitted via rider. The original bond can be viewed in a separate window in read-only mode by using the available <a href="#">View Original Bond</a> anywhere the bond is viewable. The option to save the bond as a PDF is also available.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
37314 37315	Surety Bonds: Bond Versioning – Roster Report Impacts	<p><b>Surety Bond Roster Report (Regulator)</b> The regulator surety bond roster report will be updated to include the following information in support of revised form bonds:</p> <ul style="list-style-type: none"> <li>• Bond version number column reflecting the bond version as of the latest bond revision shown in the report.</li> <li>• Revised Form Bond Effective Date column listing the latest Revised Form Bond Effective Date if a delivered revised form bond exists for the bond, otherwise NULL</li> <li>• Revised Form Bond Required column added to indicate existence of revised form bond license item (un-cleared) as Y (Yes) or N (No).</li> <li>• Rider and Rider Effective Date columns consider whether the bond has any revisions due to a Rider ONLY (not Revised Form bond) and will show the latest Rider Effective Date for the bond. Specifically:               <ol style="list-style-type: none"> <li>a. If no delivered rider exists for the bond, these fields are null.</li> <li>b. If a delivered rider DOES exist for the bond, these fields are derived from the latest delivered rider.</li> </ol> </li> </ul> <p><b>Surety Bond Roster Report (Company)</b> The company surety bond roster report will be updated as follows in support of revised form bonds:</p> <ul style="list-style-type: none"> <li>• Revised Form Bond Required column added to indicate existence of revised form bond license item (un-cleared) as Y (Yes) or N (No).</li> <li>• Column headings that refer to “rider” will refer instead “revision” and include information relevant to the currently pending rider or revised form bond.</li> <li>• Pending Revision Type column added to indicated whether pending revision is rider or revised form bond.</li> </ul>	State

# General Enhancements

SCR Number	Title	Description	Context
37117	Surety Bonds: Bond Versioning – Transaction Report Impacts	<p><b>Surety Transaction Reports (Surety Industry)</b>            Surety Transaction reports for both SC and SBP user types will be updated as follows in support of revised form bonds:</p> <ul style="list-style-type: none"> <li>• “Rider Effective Date” will be renamed to "Revision Effective Date."</li> <li>• Revised form bond signature events will show the revised form bond effective date in the "Revision Effective Date" column.</li> <li>• Transactions will be prefixed by “Rider” or “Revised Form Bond” to differentiate between rider and revised form bond transactions.</li> <li>• Revised form bond events will be returned regardless of the Include Rider events filter selection.</li> </ul>	
35230 36470 36798 37068 37721 38204	Surety Bonds: Attestation Versioning and Display	System will version attestation language so the appropriate attestation language can be rendered based on the date the action requiring attestation was taken by the user. In addition, users will be able to access transaction details and related attestation language in the bond and rider transaction history by using the new "View Details" link. The details for a revised form bond issued transaction will include a rendering of the revised form bond.	State
36918	Surety Bonds: Converted and Revised Form Bond Text Versioning	NMLS will be enhanced to retain separate and distinct versions of the converted and revised form bond text displayed in the rendering of the bond at the top or in connection with the effective date. As a new version of the text is introduced, prior bonds will continue to display the language effective at the time of creation. Only newly issued converted or revised form bonds will display the new version of the text.	State
37125	Surety Bonds: Notify Individual Signatory if Company Returns Bond/Rider to Surety	The existing signatory removal email will also be sent to the designated signatory of a bond if the bond is returned to surety by the licensee for correction before or after signature.	State

# General Enhancements

SCR Number	Title	Description	Context
36273	Surety Bonds: SC Assignment of BOR at Bond Creation	<p>A SC user will be able to assign a SBP as Broker of Record (BOR) when creating a bond. The SC user will only be able to select the SBP if the SC/Underwriting Company (UC) has an approved association with the SBP with an active state authorization for the state associated to the bond. The designated SBP will be associated with the bond as a Pending BOR until the licensee signs the bond. The SC user will be able to change or remove the SBP as BOR if bond is in a status of "Requires Rep Signature" or "Returned to Surety." The bond validations run when the SC or licensee signs the bond will be based upon the SC's authority and limits, NOT the pending BOR's.</p> <p>Upon signature by the licensee, the SBP will become the official current BOR and will be able to manage the bond, including addressing any "Returned to Surety" actions on the initial bond. A SBP serving as active BOR on a bond can also manage any rider created by a surety company user. In addition, the licensee will be notified upon signing the bond that the SBP will be granted licensee authority upon signature if such authority does not already exist.</p>	State
34665 36949	Surety Bonds: SC Assignment of BOR for Existing Bond Without BOR by Licensee	<p>NMLS will be enhanced to allow an SC to initiate a BOR change to assign SBP as BOR for all existing active bonds for a licensee that do not have a BOR. The SBP will be granted authority to create and manage bonds on behalf of the licensee upon approval of the BOR change by the licensee if authority did not already exist between the SBP and the licensee.</p> <p>Upon approval of the BOR change by the licensee, the surety company and SBP will be notified if the SBP does not have the appropriate state authorizations under the surety company association to manage one or more of the bonds that were transferred to the SBP.</p> <p>Pending bonds with a pending BOR (those created by the SC with a designated SBP) prior to licensee signature are not considered bonds without a BOR and will not be transferred to the new BOR when a BOR change is initiated for existing active bonds without a BOR.</p>	State
36670	Surety Bonds: Broker of Record Management	Bonds in a "Declined" status will not be updated to reflect the new BOR when a BOR change is approved.	State
37445	Surety Bonds: Data Analytics – ESB Data to Data Analytics	Surety Bonds data will be made available to the analytics database.	State

# General Enhancements

SCR Number	Title	Description	Context
35812 37083 37084 37085	Surety Bonds: Alternate Security Device	<p>A small number of agencies adopting ESB functionality in NMLS will permit an alternate security device to be submitted to meet financial responsibility requirements in lieu of providing an electronic surety bond. Such alternate devices may include a letter of credit or CD. State agencies will be able to provide a license setting indicating that an alternate security device is permitted for specified license types. The new license setting will be managed by support users in NMLS through the license settings interface.</p> <p>Licensees are encouraged to submit an electronic surety bond. However, if permitted by the state agency, the licensee will be able to upload a document to satisfy the electronic surety bonding requirement for new and transition license requests. The document upload must use the “Alternate Security Device” document type and be associated to the state of the agency permitting submission of such documentation. If neither an electronic surety bond or “Alternate Security Device” document is provided, the system will prevent submission of the new/transition license request via completeness check.</p> <p>Licensees should refer to the <a href="#">State Checklists</a> to determine if a license permits submission of an Alternate Security Device.</p>	State
37245	Surety Bonds: Power of Attorney Audit Trail/Authority Evidence for Regulator	<p>In order to provide evidence to state regulators of the signatory authority of the surety entity user at the time the bond or rider is signed, the System will capture and display the attestation language as well as the Signing Authority of Authorized User at the time of signature. The Signing Authority of Authorized User will display as follows:</p> <ol style="list-style-type: none"> <li>1. For a SBP representative signatory – the authorized bond limit under the appropriate SC/UC association for the applicable state.</li> <li>2. For a SC/UC signatory – the authorized bond limit for the applicable state.</li> </ol> <p>This information will display on the transaction detail page for each Signed by Surety transaction.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
33839 38241	Surety Bonds: Licensee Ability to Terminate SC Authority	<p>A licensee will be able to remove authority granted to a SC to issue and manage bond on their behalf if the licensee does not have any pending or active bonds insured by the surety company or its associated underwriting companies. Bonds in a “Notice of Cancellation”, “Cancelled”, or “Declined” status are not considered pending or active. SC users will still be able to view bonds issued prior to removal of licensee authority in their Manage Bonds list, but will no longer be able to manage them unless license authority is granted again.</p> <p>The SC will be able to update its notification subscriptions to assign users to receive a notification when the licensee successfully removes their licensee authority. If no users are subscribed to the notification, SC account administrators will receive the notifications.</p>	State
37744 38243 38244 38242	Surety Bonds: SC/SBP Ability to Remove Licensee Authority	<p>An SC will be able to remove the authority granted to them by a licensee to issue and manage bond on their behalf as long as the licensee does not have any pending or active bonds insured by the surety company or its associated underwriting companies. A SBP can remove authority if it is not the active BOR on any pending or active bonds for the licensee. Bonds in “Notice of Cancellation”, “Cancelled”, or “Declined” status are not considered pending or active. SC/SBP users will need to access the Licensee Authority List on the Left Navigation Panel under Surety Bonds Management to remove licensee authority.</p> <p>The licensee will be able to update its notification subscriptions to assign users to receive a notification when the SC/SBP successfully removes their licensee authority. If no users are subscribed to the notification, licensee account administrators will receive the notifications. NMLS will display an error message if the SC/SBP is not able to remove authority for a licensee if relevant pending or active bonds exist.</p> <p>SC users will still be able to view bonds issued prior to removal of licensee authority in their Manage Bonds list, but will no longer be able to manage them unless license authority is granted again. A SBP will be removed as active broker of record when licensee authority is removed and bonds will only be viewable from the Inactive bonds list.</p>	State

# General Enhancements

SCR Number	Title	Description	Context
37076 37985 38029 37260 37378 38234	Surety Bonds: General ESB Enhancements	<p><b>Retain Leading Zeros in Bond Number When Opening Report in Excel:</b> The System will allow the leading zeroes on bond numbers to be maintained when a system-generated report is viewed in Excel.</p> <p><b>Bond Rendering PDF page break:</b> A page break will be added to the PDF rendering of all bonds, including revised form bonds, so the rendered bond will start on a new page.</p> <p><b>Retain Manage Bond page filter search criteria:</b> Whenever the SC or SBP user runs the Manage Bonds filter, the System will retain the last entered search filter criteria even across user sessions, until the user clears the filter. The System will automatically run the last saved filter criteria for the user when the user navigates to the Manage Bonds page.</p> <p><b>License Type Drop-down for Bond Creation to consider Bond Template Effective Date:</b> System will not present a license type for bond creation until a bond template for the license type is effective in NMLS.</p> <p><b>Bond Event Detail Page:</b> Note and Authorized Bond Limit fields will not display on the Event Detail page if the field values are null.</p> <p><b>Licensee Name on Bond will populate based on ACN Effective Date:</b> NMLS will evaluate the effective date of a bond or rider and the effective date of any advance change notice for the name of the licensee when populating/updating the licensee name.</p> <p><b>Revised Form Bond/Rider Deletion Workflow:</b> System workflow will be updated to take the surety user back to the Bond Detail page after deleting a revised form bond or rider.</p>	State
38540	Surety Bonds: Support User Bonds List	Support users will have access to a filterable list that will allow them to view bonds in any status for any company. The list will permit filtering by Company Name, Company NMLS ID, State (and License Type), or Bond Number.	State

# System Maintenance Updates

SCR Number	Category/Title	Description	Context
36494	Surety Bonds: Error Message not relevant when the URL is changed from Surety Company Cancellation Page	The error message displayed when a URL is changed on the Surety Company Cancellation page will be updated for clarity.	State
36921	Two-factor Authentication: Credential not cleared on deleted user account	The System will clear credential information from a user account when the account is deleted.	State and Federal
37323	Surety Bonds: Action Taken By Entity Name in TXN Reports is showing as Null if Signed by Licensee as Individual	If a bond is returned to surety after an individual signature event, the Action Taken By (Entity) name on the Surety Bond Transaction Report will be updated to correctly display the name of the individual who signed.	State
37357	Surety Bonds: BOR event not being displayed to outgoing SBP of a BOR change	The Broker of Record (BOR) Change Processed event will always be displayed when a Surety Bond Producer (SBP) views an inactive bond for which the SBP is no longer the BOR.	State
37585	Surety Bonds: 'Surety Company Name' column in the Company Roster Report is Uppercase	The Company Roster Report will be updated to display the value for Surety Company exactly as it is stored in the database.	State
38039	Surety Bonds: Validation Message for Minimum Bond Amount License setting Needs to Be Updated	The Surety Bond Minimum Bond Amount License setting validation message will be updated for clarity.	State
38044	License Settings: SuretyBondCanBeCancelled is YES, SuretyBondCancellationNoticeDays Scenario throwing GSE	The System will be updated to display the appropriate message when the <i>Surety Bond Can Be Cancelled</i> field is changed and the value provided in the Surety Bond Cancellation Notice Days field generates an exception on the License Settings page.	State
38132	Criminal Background Checks: Individual has multiple CBC authorizations open	The System will be updated to prevent creation of multiple open CBC authorizations when an individual is listed as an MU2 individual on more than one company (MU1) filing.	State
38187	License Settings: Wizard does not proceed when decimal entered for Automatic Renewal Days	The License Settings Wizard will present a validation error message if a user attempts to enter a number with a decimal for Automatic Renewal Days.	State
38233	Surety Bonds: BOR Event for Declined Bond is not Showing Up in the Report	The Broker of Record (BOR) Event will display in the Surety Bond Transaction Report for a declined bond.	State

# System Maintenance Updates

SCR Number	Category/Title	Description	Context
38344	Surety Bonds: Clear button on "Manage Bonds" page filter is not clearing Data in the Filter Options	The clear button on the Manage Bonds page filter will now remove data entered into the search fields.	State
