

NMLS Release 2015.3.2 – Release Notes

Release Date: September 21, 2015

The purpose of these release notes is to provide a summary of system enhancements included in NMLS Release 2015.3.2.

General Enhancements

SCR Number	Title	Description	Context
31093	Advance Change Notice: Processed ACN Notification Sent to Regulator that does not subscribe to the ACN review item	<p>A second subscribable notification will be implemented to allow regulators to control when they receive notice of Advance Change Notices (ACNs) that process without regulator approval. The second notification will have the same text as the existing notification; however, will be sent only for ACN events where the agency subscribes to the corresponding review item. The subscription label for the existing notification will be updated from:</p> <p><i>Unapproved ACN put into effect <u>to</u></i> <i>Unapproved ACN put into effect (for any event regardless of Review Item subscription).</i></p> <p>No action is required if regulators want to continue to receive notifications for all ACNs that process without regulator approval.</p> <p>To receive notifications when ACN events process without approval only if their agency subscribes to review items for the event a regulator user with the Manage Notification Contacts role must update current notification subscriptions from:</p> <p><i>Unapproved ACN put into effect (for any event regardless of Review Item subscription) <u>to</u></i> <i>Unapproved ACN put into effect (for relevant subscribed Review Item type).</i></p> <p>Regulators subscribed to both notifications will receive both notifications.</p>	State

General Enhancements

SCR Number	Title	Description	Context
17458	Advance Change Notice: Hide ACN History Records from Company Users when <i>Is Reviewed</i> is Updated	The Advance Change Notices history for company users will be updated to exclude history records created when the <i>Is Reviewed</i> indicator is updated. This will eliminate what appears to be duplicate history records as company users are not able to see the <i>Is Reviewed</i> indicator.	State
22926	Authorized Agent: Composite Search for Agent is limited to EIN if additional fields are checked	The search functionality for Authorized Agents will be enhanced so that when a user searches by Agent EIN, the System will allow the user to restrict the search by state if selected. Searching by Agent ID without providing the EIN will override all other search criteria entered.	State
21803	Payment Processing : Invoice Search Functionality	NMLS will be enhanced to add an export feature on the <i>Search all Invoices</i> page. This enhancement will generate a single spreadsheet with charge level details for all invoices returned in the search results (as is currently available in the single invoice spreadsheet).	State, Federal
18300	Payment Processing: Return user to original payment screen once error is encountered	NMLS will be enhanced so that if there is an error encountered during payment processing, the payment type and payment information screens will return to the originally selected payment method.	State, Federal

System Maintenance Updates

SCR Number	Category	Description	Context
31922	Regulator Workflow	If an agency user changes the user on the Reminder List Dashboard, clicks a license type and opens a license item, the system will retain the selected user when selecting the breadcrumb (License Item Reminder List) to return to the Reminder List.	State
31915	SRR Managed Settings	If a state agency has not set the <i>Has Net Worth Requirement</i> to Yes, the System will not validate any value entered in the <i>Net Worth Minimum</i> field.	State

Browsers Used for Testing NMLS

Manual Testing : Firefox 32 / IE9 / IE 11 for functional testing

Automation : Firefox 19 and IE9 (ad-hoc basis)

Sauce Labs is used occasionally for specific OS / Browser Combination in QC environment.
