**Definition of “Application”**
SRR is introducing a clarified definition of “Application” to address the issue of various definitions of “application” in state and federal law. These various definitions create challenges when collecting loan origination information and comparing the different reporting requirements and interpretations of what constitutes an “application” for purposes of state, federal, and MCR purposes.

The following, revised definition is offered as guidance starting in the first quarter of 2015. Absent further guidance from state regulators, this revised definition will have full system enforcement the first quarter of 2016. This will be applicable to all MCR filers - Expanded and Standard.

- An application is an oral or written request for an extension of credit encumbering a 1-4 family residential property. Exclude any commercial/business/investment purpose encumbrances from reporting. Include inquiries or Pre-Qualification requests that result in denial of credit. The application date used is either (1.) The date on the initial 1003 with the borrower’s signature; (2) The date of an oral request for extension of credit, with deference to the initial1003; (3) Inquiries and Pre-Qualification requests, if declined, should use the denial date. Examples of requests that are considered an application for the NMLS MCR include, but are not limited to, purchase of owner occupied 1-4 family residential properties including 2nd homes and vacation homes; construction of 1-4 family residential properties (as described above) made directly to the consumer; non-commercial liens on residential properties (Lines of Credit should be reported at maximum approved credit line); pre-approvals on item #1 even if a residential property has not been identified; reverse mortgages – regardless of purpose; refinance loans on all of the above; all requests for extensions of credit to purchase residential property that result in the issuance of an ECOA notice.

The below definition of “application” will be in use for 2015 MCR reporting.

- An oral or written request for a home purchase loan, a home improvement loan, or a refinancing that is made in accordance with procedures used by a financial institution for the type of credit requested (Per Reg B). Examples of requests that are considered an application for the NMLS MCR include, but are not limited to, any HMDA reportable application, pre-approval requests, request without a property address, or requests which include access to the borrower's credit information.
